Below is an example of a recent MERIT QQQ System trade from start to finish. On October 22, 2013, the MERIT QQQ System identified a call opportunity for QQQ (Powershares QQQ). Remember, these exact entries, exits and all necessary adjustments are sent instantly to your inbox, phone or auto-trade broker.

Wed, Oct 22, 2013 at 10:52 AM - We want to buy the QQQ (Powershares QQQ) December Q4 (December Q4, December 31 expiration) 83 Call for 1.60 limit.

- The auto-trade brokers confirmed the entry fill price for this order at 1.45.

On Friday October 25, 2013 a profit target of 1.85 was reached and confirmed by our auto-trade brokers. A follow up reminder for any individuals trading their own accounts was then sent.

Fri, Oct 25, 2013 at 9:23 AM - 10/22-Bought the QQQ (Powershares QQQ) December Q4 (December Q4, December 31 expiration) 83 Call for 1.85 limit. If you were not filled on the order to sell to close at 1.85 limit, please cancel that order and sell to close at the market.

The Powershares QQQs are extremely liquid. Which means entries and exits are easier to obtain because of the number of shares traded. On average, 66.1 million shares are traded a day.

In addition to the QQQs having the highest volume of all ETFs, it also has huge open interest in its options which makes for not just guaranteed but quick entry and exits. The circumstance that sometimes happens in more obscure options, where there isn't enough buying interest to purchase your calls or puts will never happen or that it takes time for the market specialists to negotiate the buy back. With the QQQs, it happens in an instant.

When you trade the QQQs, you have automatic diversification because each share of the QQQs is comprised of the stock of 100 different companies.
